

Prime Series Forestry & Logging Grapple

This grapple is nothing short of a MONSTER. The bucket bottom is all $\frac{3}{4}$ " Grade 50 steel with approx. 12" of spacing between the tines. The Cutting edge is a $\frac{1}{2}$ " Grade 50 steel and the massive grapples coming over the top are also $\frac{1}{2}$ " Grade 50. We overkill this grapple for the big dog skid steers like our Bobcat T770 and put this thing to the test! Serrated teeth on grapples for added grip, all greaseable pivot points, domestic Parker hoses, Parker fittings, and Parker couplers. Grapple opening @ 52 $\frac{1}{2}$ "

Width	Length	Height	Spacing	Edge	Weight
74"	38 $\frac{1}{2}$ "	38"	12"	$\frac{1}{2}$ " G50	1,200 lbs
84"	38 $\frac{1}{2}$ "	38"	12"	$\frac{1}{2}$ " G50	1,300 lbs
